EDITORIAL BOARD

**Joan Cunningham** (Ph.D. Public Health: Epidemiology) is a cancer epidemiologist, recently retired from the Medical University of South Carolina. She holds an MSc (Biology: aquatic eco-embryology) from the University of Guelph, Ontario, Canada and Ph.D. (Public Health: epidemiology) from the University of Texas School of Public Health (Houston). Her work focuses on racial disparities in breast cancer, and non-pharmacological mitigation of cancer treatment side effects. She also gives invited lectures on cancer epidemiology to the graduate program at the University of Texas Health Science Center at San Antonio, Texas.

**Amanda Haste** (Ph.D. Musicology; Dip.Trans.IoLET) is a British musicologist and academic translator whose research interests include identity construction through music and language. She is a member of the Chartered Institute of Linguists and teaches courses in Translation and in English for Specific Purposes at Aix-Marseille University, France. Her research has been published in leading journals and books by major editors, and she co-authored *Constructing Identity in an Age of Globalization* (Paris: Ex Modio, 2015); and her awards include the Louise Dyer Award for research into British music, and the Elizabeth Eisenstein Essay Prize (2018).

**Jordan Lavender** (Ph.D. Spanish Linguistics) teaches Spanish and Latin American History at Pomfret School in Pomfret, CT and has conducted research on the use of minority languages on Twitter in Spain, bilingualism in the linguistic landscapes of Azogues, Ecuador, and forms of address in Ecuadorian Spanish, based on ethnographic research in both online and offline contexts.

**Annie Rehill** (Ph.D. Modern French Studies, MFA) specializes in the literature and history of Francophone Canada, focusing on intercultural expressions and implications. Most recently she has studied Métis literature and art. Previous work in ecocriticism centered on representations of the Canadian *coureur de bois* figure, and on Francophone Caribbean writings. Her publications include “Le Travail dans la nature canadienne: L’Équilibre (et le déséquilibre) humain tel qu’il est représenté par Louis Goulet et Joseph-Charles Taché” (2018); “An Ecocritical Reading of Joseph-Charles Taché’s *Forestiers et voyageurs*” (2018); *Backwoodsmen As Ecocritical Motif in French Canadian Literature* (2016); and “Inscriptions of Nature from Guadeloupe, Haiti, and Martinique” (2015).

**Shelby Shapiro** (Ph.D. American Studies), the General Editor of *The Independent Scholar*, served for many years as the English-language editor of *Tsum punkt/To the Point*, the magazine of Yiddish of Greater Washington, as well as for its predecessor publication. He is currently Associate Editor of *Records of the State of Connecticut*. His Ph.D. dissertation dealt with acculturation and American Jewish women in the Yiddish press; he is a Yiddish-English translator, and his research interests include Jazz and Blues (having presented jazz radio programs for nine years), the labor movement, the First World War, and immigrant anarchism.

**Tim Woolley** (Ph.D. Theology) is a British Methodist minister and adjunct lecturer at Cliff College, tutor for the Methodist E-Academy and the Oxford University Department of Continuing Education, and research associate of Wesley House, Cambridge. He researches 19C British Methodism, the Holiness Movement, Revivalism and Nonconformity and has co-written *Mission Shaped Intro* (2nd ed.) for Fresh Expressions of Church and *Talking of God* and *Worship: Leading and Preaching* for The Methodist Church in Britain.
NOTES FOR CONTRIBUTORS
All members of NCIS and their affiliated Partner Group organizations are cordially invited to submit manuscripts to The Independent Scholar (TIS). We welcome submissions in the form of traditional essays as well as creative or artistic material on any topic that will appeal to our members. Your manuscript may be presented in the TIS house style and should be referenced according to APA style. It should conform to the academic standards demanded by NCIS and will be subjected to a robust peer review process. Please consult the submission guidelines before submitting NCIS material, but if you have any queries don’t hesitate to contact the relevant member of the TIS Editorial Board. Manuscripts and queries should be sent to the General Editor at tis@ncis.org.

If you have a book you would like reviewed, or you would like to offer to review a book, please email the Book Review Editor on reviews@ncis.org. As a guide to length and content, you can download previous reviews from https://www.ncis.org/book-reviewsthe-independent-scholar-tis.

About NCIS
The National Coalition of Independent Scholars is a 501(c)3 nonprofit corporation (est. 1989) which supports independent scholars worldwide and provides them with a valuable scholarly community. NCIS represents independent scholars from every continent and in many disciplines in STEM and the Humanities. Its members include unaffiliated scholars, adjunct and part-time faculty, emeritus professors, graduate students, researchers, artists and curators. The benefits of membership are many, but the great benefit of joining NCIS is affiliation with an internationally recognized intellectual society. Today, NCIS is an international organization whose members hail from many countries and pursue diverse fields of study in a variety of disciplines. This is the population NCIS proudly serves.

Member Benefits
NCIS MEMBERSHIP offers opportunities for travel and research grants, member discounts and academic support.

FREE MEMBER RESOURCES include your own member profile page, an NCIS.org email address, and NCIS letters of introduction.

ACADEMIC OPPORTUNITIES & RESOURCES include publication in and/or peer reviewing for The Independent Scholar, book reviewing (or having your own academic book reviewed), free webinars and access to resources on academic skills such as presenting conference papers, chairing conference sessions, and publishing your work.

GRANT AWARDS for which members may apply include NCIS Conference Support Grants and NCIS Research Grants (six awards per year) and the annual Elizabeth Eisenstein Essay Prize. External grant awards can also be administered by NCIS thanks to our 501(c)3 status. More information on all these can be found at www.ncis.org/grants.

MEMBER DISCOUNTS are offered for JSTOR Journal Access and Nota Bene referencing software, and also on Professional Writing and Translation Services from NCIS members.

NETWORKING OPPORTUNITIES include discussion groups on Facebook, Twitter, LinkedIn, collegial support services, regional and online member gatherings, and international NCIS Conferences at major academic institutions.

Find us, follow us, friend us on Facebook, Twitter, LinkedIn, H-Scholar and Academia.

"Everything has a history": so said the mysterious "they." In *A Place for Everything: The Curious History of Alphabetical Order* (2020), social historian Judith Flanders presents a case in point. What could be more obvious and taken-for-granted than alphabetical order? This is as natural as a-b-c—except that it isn’t. In this wide and deep-ranging panoramic study, Judith Flanders takes the reader across continents, civilizations, cultures, and centuries as she traces how and why alphabetical order came to be the favored form for organization, storage and searching.

The book is divided into ten chapters (please note her form of ordering): Antiquity, Benedictines, Categories, Distinctions, Expansion, Firsts, Government, History, Index Cards, then skipping to Y2K. This book presents a deep dive into the concepts and applications of different forms of ordering, sorting, distinguishing, categorizing, and storing information. The alphabet as an ordering tool, as demonstrated by the chapter headings in this book.

On a deeper level, this book is less about alphabetical order and more about the development of different methods and concepts of information storage, retrieval, ordering and the development of appropriate tools towards those various ends. She points out the role of cultural perceptions and beliefs in perception, ordering and categorizing. For example, Flanders notes the symbolism of numbers:
Numbers more generally also represented more than mere quantity. Three was a key number, representing as it did the holy Trinity; six was perfect, because God created the universe in six days; the number seven was important, too, for God rested on the seventh day; ten stood for the number of commandments; forty for the days Christ spent on earth after the Resurrection.

Flanders warns readers against present-day self-congratulation in a footnote to the above-quoted section: “(d)octors in the West today routinely prescribe drugs for three or seven days—those numbers of the Trinity and the Sabbath—even though evidence from clinical trials suggests that two or eight days works every bit as well” (p. 32n), referenced by a 2006 paper in the British Medical Journal. (p. 270n, 11).

Hierarchical ordering tied in with prevailing world views. Thus, “beginning with God, then angels, then, dealing with subjects that arose as it followed the order of the six days of creation, before returning to a hierarchical arc with man, the soul, the body, and the natural world.” (p. 67-68).

In discussing the book most frequently used in English—Roget’s Thesaurus, Flanders notes that “[b]ased on an eighteen-century view of the natural-history classification system, its layout is organized by phyla, classes, order, and families—a system that is impenetrable to the great majority, if not all, of its modern-day users. The alphabetical index, which all twentieth- and twenty-first-century editions of Roget contain, is considered so necessary today that it typically occupies more than half the book.” (p. 229).

Flanders demonstrates various forms of ordering and categorizing that existed before, during, and after the “triumph” of alphabetical order. The Dewey Decimal System, for example, orders by subject, and utilizes other forms within the main subject heading. She also points out how he baked misogyny and allegiance to Christianity into the system: under religion (numbers 200+), Dewey allotted numbers 200-289 for Christianity, and just number 297 for Islam “Women, meanwhile, are patronizingly categorized alongside etiquette.” (p. 217n).

She demonstrates how various ordering systems had cognitive side-effects, and physical ones. In the form of technological changes. Thus, the vertical or hanging file first made its appearance in 1893 (p. 219). This method of information storage could be used in any type of ordering system. Ordering problems led to desk designs, and spindles for storage of individual items of information. To this Flanders could have added different kinds of storage system for books, a subject nicely covered by engineering historian Henry Petroski in his The Book on the Bookshelf (1999).

Along the way there are all manner of fascinating digressions: the word “criss-cross,” for example, came from “Christ’s cross,” a wooden panel setting forth the alphabet, numbers, and the Lord’s Prayer, often with a cross at the top. Students would say “Christ’s cross me speed” before reciting the alphabet as early as the 15th Century C.E.; in a footnote Flanders comments that “Over the centuries the phrase was reduced first to ‘Christ’s cross,’ then in nineteenth-century dialect, to ‘criss-cross,’ to mean the alphabet, which was probably reinforced by the convention whereby those who could not write signed documents with an ‘x,’ or crisscross.” (pp. 124-125, 125n). She talks about everything from Babylonian inscriptions to Sumerian cuneiforms, from the development of telephone systems and switchboards to the appearance of telephone directories years later, and alphabetically tabbed paper dividers.

In discussing the organization of encyclopedias in an alphabetical system, she writes:

But until the alphabet became the encyclopedia’s principal organizing system, these works could not be seen as truly modern. Nor because one system of organizing is better than any other, but because the use of alphabetical order, once more, marks a transition in worldview. Just as the spread of alphabetically organized dictionaries and indexes had indicated a shift from seeing words purely as meaning to seeing them a a series of letters, so too the arrival of alphabetically ordered encyclopedias indicated a shift from seeing the world as a hierarchical, ordered place, explicable and comprehensible if only a person knew enough, to seeing it as a random series of events and people and places. (p. 186).

There is nothing inevitable about alphabetical order. Flanders notes that the Encyclopaedia Britannica “. . . returned to the Middle Ages in 1974, when it divided sits content into a ‘Macropaedia,’ a ‘Micropaedia,’ and

Review: Flanders - A Place for Everything: The Curious History of Alphabetical Order.
First published online 23 March 2022. To be published in a forthcoming issue of The Independent Scholar.
a ‘Propaedia.’” To make all this useful to readers “required a two-volume alphabetical index.” (p. 196n). Flanders discusses the challenges posed by languages written in ideograms, such as Chinese. Japanese has three writing systems: the ideogram-type kanji (where symbols represent words or concepts), and two alphabetical scripts, both of which are written according to syllable-plus-vowel: hirakana and katakana, the latter often used for foreign names. (p. 231). Thus jazz guitarist Herbie Ellis becomes in katakana “he-ru-bi e-ri-su”. While in 1921, the International Olympic Committee mandated that countries would appear in the opening ceremony in alphabetical order. But whose alphabet? Further mandates amending that decision occurred in 1921, 1964 and 1988. In the Beijing Olympics of 2008, the host country used a system going back to the fourth century. (pp. 227-228).

This book fits in well with the work of sociologist Evitar Zerubavel, author of books such as The Seven Day Circle: The History and Meaning of the Week (1985); Hidden in Plain Sight: The Social Structure of Irrelevance (2015); and Taken for Granted: The Remarkable Power of the Unremarkable (2018). He has made it his mission to bring the background into the foreground: what role does the frame play in defining the picture? The Seven Day Circle discusses the seven-day week as a social construct.

Judith Flanders’ A Place for Everything deserves a place on your bookshelf. Informative, witty, thought-provoking and well-researched, this book makes the reader more aware and conscious of the what, why and how of categorizing, ordering, and understanding.

Shelby Shapiro (Ph.D. American Studies), the General Editor of The Independent Scholar, served for many years as the English-language editor of Tsum punkt/To the Point, the magazine of Yiddish of Greater Washington, as well as for its predecessor publication. He is currently Associate Editor of Records of the State of Connecticut. His Ph.D. dissertation dealt with acculturation and American Jewish women in the Yiddish press; he is a Yiddish-English translator, and his research interests include Jazz and Blues (having presented jazz radio programs for nine years), the labor movement, the First World War, and immigrant anarchism.
